

Develop your security expansion or relocation plan.

When you are expanding or moving your organization, security planning is critical to your success. Many project managers forget this crucial element and miss important, often cost saving measures that should be implemented before, during and after your space addition or move to a new location. Our professionals can help you locate and measure crime risk data, determine security force staffing, develop physical and technology security strategies as well as steps to keep your people safe and secure.

OUR EXPANSION OR RELOCATION SECURITY SERVICES INCLUDE:

- Physical barriers such as fences, gates, doors, windows, locks
- Access control systems
- Vehicle and pedestrian control devices
- CCTV systems
- Intrusion Alarm Systems
- Intercom systems
- Emergency phones
- Lighting quality and level of illumination

Have you considered?

Physical Security

What to check when researching or inspecting the physical space?

Is the exterior of the building adequately illuminated?

Are doors strong, formidable and equipped with secure locking devices?

Are windows adequately secured?

Is there access control of tenants, visitors and vendors?

Does the building have a key control system?

Tenant Protection

Do you have a security awareness program for tenants?

Provide physical perimeter security and adequate lighting?

Limit access points for vehicles and persons?

Have panic buttons, emergency phones and CCTV?

Patrol the interior and exterior of your property?

Choose Board Certified professionals before you begin planning your expansion or relocation. Call JD Security Consultants, LLC at 610.269.8086 to learn the details you need to know to fully protect yourself and your organization.
